HIV/STI/HCV Program

The New England HIV Symposium
Thursday, May 25, 2017

Daniel Daltry, MSW
Program Chief

HIV Care and Prevention

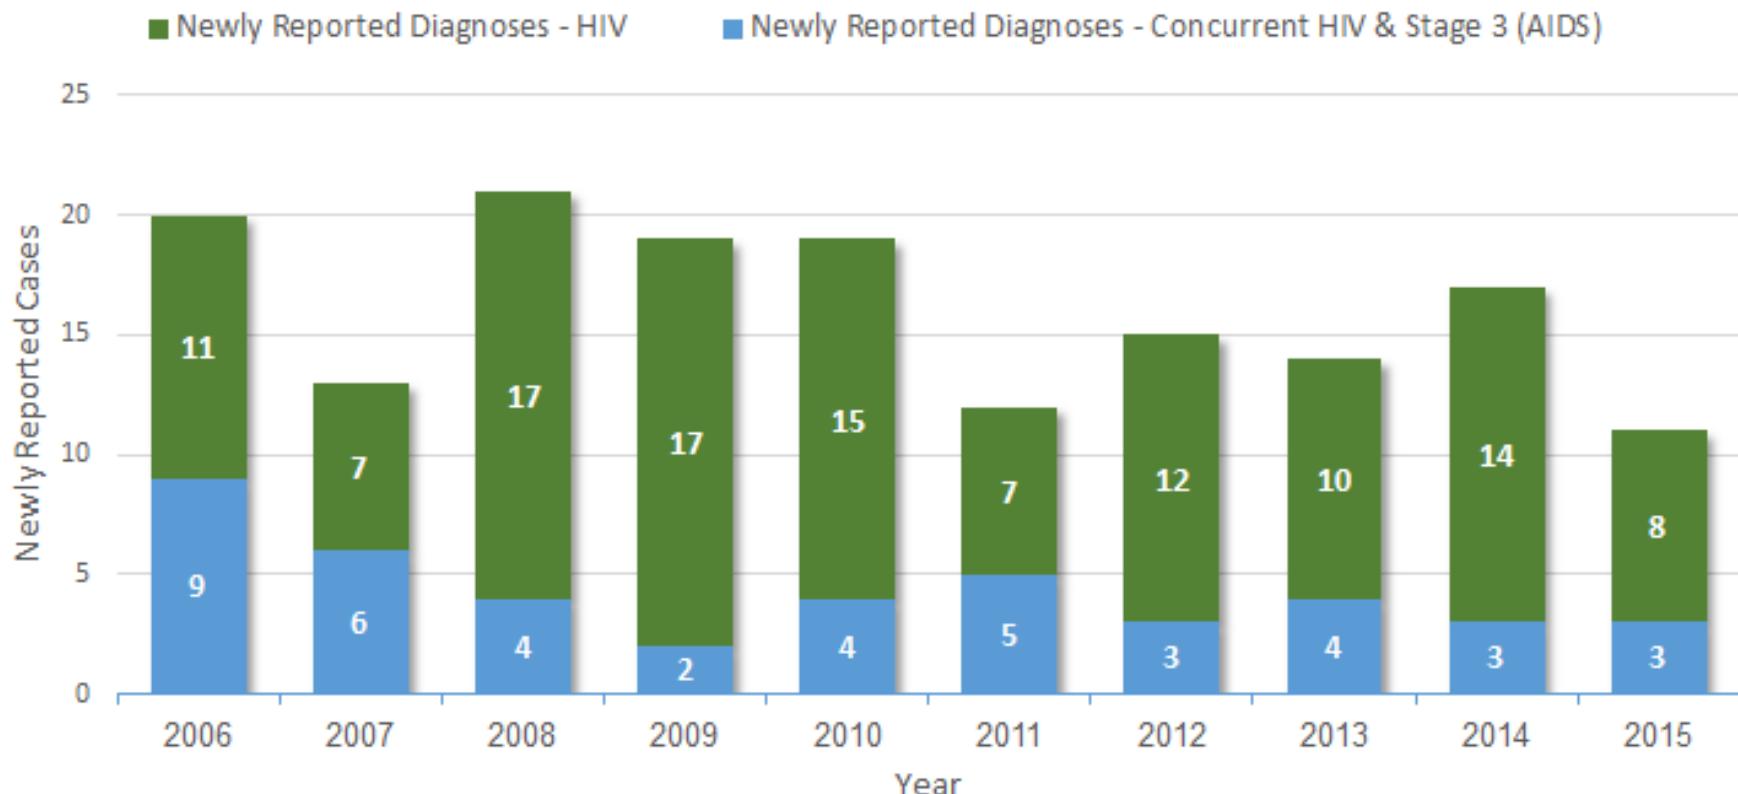

4 NHAS Indicators particularly relevant to Vermont:

- Increase % of newly diagnosed persons linked to HIV medical care within one month to at least 90%.
- Increase % of persons with diagnosed HIV infection who are retained in HIV medical care to at least 90%.
- Increase % of persons with diagnosed HIV infection who are virally suppressed to at least 90%.
- Reduce % of persons in HIV medical care who are homeless to no more than 5%.

Research Questions

- ***Would Safe Injection Sites avert new HIV infection and address the rising opiate overdose deaths in the New England Region?***
- ***What impact are DIS having:***
 - *Identifying new HIV infection*
 - *Reengaging individuals in HIV Medical Care*
 - *Averting HIV infection by linking consumers to PrEP*
 - *With gay/bisexual men*
