Session Aim: To develop HIV/AIDS implementation science “research projects” specific to New England that can directly support the regional attainment of the 90/90/90 goals to end the HIV epidemic by 2030.

UNAIDS. (2014). 90-90-90: An ambitious treatment target to help end the AIDS epidemic. http://www.unaids.org/sites/default/files/media_asset/90-90-90_en_0.pdf.

Session Product: Scribes will use news print to write down answers/discussion points addressing Questions below. Each group will record highlights of the discussion summarizing gaps and prioritized research projects/questions/ideas pertinent to the discussion theme they believe need to be developed and pursued.

Session Discussion Topics/Questions

Topics	Enhancement/expansion to existing Network projects	Promising practices in the field that merit further evaluation	Network Research Development
Questions	<p>Are there key populations or important research questions that are not addressed in the ongoing regional projects that should be the focus of additional and/or expanded Network research projects?</p>	<ul style="list-style-type: none"> • Are you aware of HIV/AIDS interventions that are working effectively to reach and engage disproportionately impacted populations in your community, or other places, that may be scalable to New England? • What are these interventions and where are they being implemented? • Are you using social media tools for interventions to reach and engage your clients, research subjects, and/or populations most affected by HIV? • What are the organizational and programmatic barriers to implementation of effective interventions in your organization, community, and area? 	<p>How can the Network support expansion of existing projects and development of new projects/ideas?</p>
