at Yale University

**A REVIEW AND HIGHLIGHTS OF
PUBLICATIONS BY CIRA AFFILIATES
2012-2019**

May 2020

**Center for Interdisciplinary Research on AIDS
Yale University**

SUMMARY

About CIRA

The Center for Interdisciplinary Research on AIDS (CIRA) was established in 1997 and is currently New England's only National Institute of Mental Health (NIMH) funded AIDS research center (P30MH062294, Paul D. Cleary). CIRA brings together scientists from three institutions including Yale University, The Institute for Community Research and the Institute for Collaboration on Health, Intervention, and Policy (InCHIP) at the University of Connecticut. The Center's mission is to support innovative, interdisciplinary research that focuses on the implementation of HIV prevention and treatment and the elimination of HIV disparities.

About this review

There are 167 CIRA affiliates and 75 active research and training projects affiliated with the Center. The purpose of this bibliography is to serve as a broad guide to published research conducted by CIRA affiliates that addresses the HIV care continuum and pertinent areas of interest, and characterizes research expertise and activities in the U.S. and globally. The literature included in the bibliography is drawn from articles authored by CIRA affiliates that were indexed on PubMed between July 3, 2012 and December 31, 2019. The current bibliography, published in May 2020, is the fifth update of the review prepared by Ms. Dini Harsono, Assistant Director of CIRA's Clinical and Health Services Research (CHSR) Core.

Methods

Articles listed in "What's new for CIRA Affiliates in PubMed" weekly emails between July 3, 2012 and December 31, 2019 were extracted into an EndNote library. Initial screenings of titles, abstracts, and keywords were conducted to exclude duplicate publications, articles that were not related to HIV, author name ambiguities, and retrospective publications prior to the individual's affiliation date with CIRA. A total of 1387 papers comprising original research, reviews, letters, and editorials were included in the review. Complete articles were retrieved and read for further verification.

Results

The review results were divided into two main categories: 1) articles that pertain to the steps of the HIV care continuum (categories 1-5), and 2) articles related to research areas of interest and sociocultural aspects of HIV/AIDS (categories 6-17). Articles were also grouped by locations (domestic and international). Articles were ordered by first author's last name and year of publication and underlined authors were identified as CIRA affiliates during the review period. If a publication included outcomes that fit more than one care continuum step and/or also focused on areas of interest, it was listed in multiple categories. For example, a paper on mobile phone-based HIV prevention intervention was highlighted under 'HIV prevention' and 'eHealth'.

Definitions of the HIV care continuum steps used in the review were broadly based on Risher et al.'s classifications of studies designed to improve components of the continuum in the US.¹ Implementation science terms and definitions that were used to identify relevant articles were adopted from recent review papers.²⁻⁴ Following Smith et al.'s implementation research continuum,² articles that did not evaluate the impact of implementation strategies but can be classified as being in the "implementation preparation" phase were recognized as implementation research-related articles.

1. Risher KA, Kapoor S, Daramola AM, Paz-Bailey G, Skarbinski J, Doyle K, Shearer K, Dowdy D, Rosenberg E, Sullivan P, Shah M. Challenges in the evaluation of interventions to improve engagement along the HIV care continuum in the United States: a systematic review. *AIDS and Behavior*. 2017;21(7):2101-23.
2. Smith JD, Li DH, Hirschhorn LR, Gallo C, McNulty M, Phillips G, Birkett M, Rafferty M, Rao A, Villamar JA, Baral S. Landscape of HIV implementation research funded by the National Institutes of Health: a mapping review of project abstracts. *AIDS and Behavior*. 2019 Dec 16:1-9.
3. Odeny TA, Padian N, Doherty MC, Baral S, Beyrer C, Ford N, Geng EH. Definitions of implementation science in HIV/AIDS. *The Lancet HIV*. 2015;2(5):e178-80.
